

# ENVIRONMENTAL POLICY STATEMENT

## Environmental Policy Statement

Our approach to environmental management involves optimizing business processes to minimize potential harm to the environment. As we conduct our operations, we are committed to consistently enhancing our environmental performance and taking the following aspects into account:

- Implementing designs for activities and processes that minimize their environmental footprint.
- Employing measures to safeguard the environment by preventing pollution of air, land, water, and natural resources.
- Enhancing energy efficiency to reduce our overall carbon emissions.
- Practicing water conservation.
- Monitoring and regulating process-related impacts such as odor, noise, and effluent released into the atmosphere.
- Reducing waste materials, thereby minimizing reliance on landfilling or incineration, in accordance with the Environmental Protection Act 1990.
- Maximizing the reutilization and recycling of recoverable materials.
- Ensuring responsible disposal of unavoidable waste in a safe and ethical manner.
- Collaborating with Waste Electrical Electronic & Equipment ('WEEE') accredited agencies for the proper disposal of such materials.
- Substituting hazardous COSHH materials with alternatives that have a lower environmental impact.
- Establishing performance improvement objectives and targets.

We are dedicated to not only meeting but surpassing the requirements stipulated by current environmental legislation and compliance obligations. This commitment extends to raising awareness about our environmental policy within and beyond the scope of The company.
